Instructions for Obtaining a Signature Waiver for the DNR Permit

Signature waivers are valid for one year and shall be requested on an annual basis. If obtaining signatures would create an undue burden on the permittee, the signature requirement may be waived if an alternate form of landowner notification is provided. This may include either: 1) A news media release, 2) A public notice in a local newspaper, 3) A public meeting, or 4) A mailing to the most recent permanent address of affected landowners

(Board decided to send out email and mailing to notify landowners. In this mailing would be information on boat parade and annual meeting)

The permittee must notify landowners of shoreline annually and provide the following: 1) The proposed treatment date of control, 2) The target species, 3) The method of control or product being used, and 4)

Instructions on how the landowner may request that control not occur adjacent to the landowner's property. Includes information on: a. Landowner's property b. Description of the location of the property

Please provide copies of documentation to the DNR. The DNR will confirm that all requirements are met. Be advised, you must comply with all waiver requirements including the alternative landowner notification BEFORE your permit can be issued.
